"The Pro-Adjuster is fast, effective, Gentle and FDA cleared"

"No more popping, cracking, twisting and bending"

\$17 billion of stimulus funding is earmarked to encourage the use of electronic medical records. - We are already there!

Executive Summary of Practice

Rogers' Chiropractic has been helping people feel better and live more productive and active lives since 1985 at the same location of 8152 NW Prairie View Road in North Kansas City, MO.

Dr. June Rogers and staff believe in offering the most effective way to provide the highest quality of patient service during every step of the relief and rehabilitation process. This means a holistic approach to treatment, including educational information, health coaching and visual graphics to help patients interpret the area(s) of concern and path to recovery.

Rogers' Chiropractic prides itself by consistently going beyond traditional Chiropractic care with new advancements in technology, nutrition and patient care. This is why we are now serving the third generation of family patients while attracting new business through a strong referral base.

Good Location

Our office location, south of Zona Rosa, has easy wheel-chair access just steps away from our office. Patients can come for a treatment and then shop or eat at Zona Rosa! This is why we have been at this same location for 24 years!

Why Chiropractic Care For Corporate Wellness?

Chiropractic healthcare is a branch of the healing arts based on the scientific fact that our nervous system controls or influences the function of every cell in our body. The Chiropractic model of health is centered on the philosophy that the human body, being knit together in a wonderful way, will heal itself given the right opportunity and circumstances providing optimal health.

Nerve Impingement Syndrome occurs when a misalignment of one or more of the joints in the spine places pressure on a nerve. Nerves communicate from the brain through the spinal cord and nervous system. Pressure on the nerves can cause interference with the transmitted signal which creates an array of symptoms.

Symptoms of Nerve Impingement Syndrome:

*Pain • Discomfort • Headaches • Fatigue • Sleep Disturbances
Sinus and Allergy Issues • Mood Swings • Digestive Problems*

These symptoms can develop for a variety of reasons, including an accident trauma, poor posture or diet, lack of or incorrect exercise, a sports or repetitive motion injury, relationship or financial stress. In other words, EVERYONE has developed these symptoms at some point in their lives. Over 75% Americans have developed one of more of these symptoms which perhaps could be relieved with Chiropractic Care.

Qualifications and Education

Chiropractic, like any profession, needs to stay on top of new advancements that will provide better care for our patients. This is why we are proud to present you with such a long list of education and industry involvement. This training and participation allow us to simply be the best Chiropractic care practice in the Kansas City area.

Pro-Adjuster Technology

The Pro-Adjuster Chiropractic System is an unmatched healthcare system because it brings together the quality of the hands-on approach to healing of Chiropractic, with the reliable interpretation of a computer. The Pro-Adjuster comes from technology born and raised by NASA to test whether the rivets on the shuttle could withstand the vibration of takeoff and landing. Now this technology has been made to work for the human body and received full FDA clearance on December 5, 1999.

With the Pro-Adjuster technology, Rogers' Chiropractic is able to more accurately determine whether the vertebra's motion is too rigid or too fluid. However, instead of utilizing the doctor's judgment as to what areas are too rigid or too fluid, the Pro-Adjuster measures precise levels of motion. Therefore, the Pro-Adjuster can isolate a problem area faster and more accurately than manual procedures. Rogers' Chiropractic offers the same level of care to our patients bodies as a multi- million dollar spacecraft.

Rogers' Chiropractic is the pioneer of the ProAdjustment system in the Kansas City Metro area. We began utilizing this technology in 2003.

Unique Level of Care

With our hands-on caring approach to Chiropractic and the use of the Pro-Adjuster, we begin our treatments with a one-on-one conversation to determine the patient's medical history and the possible causes of their problem. We seek to first understand and diagnose prior to making any adjustments. Therefore we utilize the Pro-Adjuster's sophisticated computerized analysis to pinpoint the problem areas. The information is then charted graphically on a computer monitor, so that we can detect the problem areas on each and every visit.

Once a proper diagnosis is made we use the Pro-Adjuster's resonant force impulses precisely to the affected areas, so that our patient receives gentle, effective treatment. This is the best method to relieve the pressure on the nerve, allow the nerve to heal and restore the nerve's ability to transmit signals to and from the brain more freely. Most importantly, it will help relieve the pain! In addition, we take the readings after the adjustment with the Pro-Adjuster to compare the results. That's putting analysis on a whole new level!

Computerized Record Keeping

We utilize an electronic medical record system that allows us to better diagnose and communicate with our **patient's** primary care providers and other medical specialists. The software translates our data and treatments into a format that the rest of the medical community understands. ***We are able to electronically communicate the medical records with other medical providers providing seamless care and intra-professional trust. This allows us to provide a better level of care for our patients.***

Why Rogers' Chiropractic?

In summary, Rogers' Chiropractic is a good solution to supplement your employee benefit program to relieve the symptoms of the stress your employees care. Based on our hands-on holistic approach to healing, coupled with the technology of the Pro-Adjuster System we can provide. With our ability to maintain computerized records and the proper HIPAA requirements we truly can partner with your organization to provide your benefactors with the best healthcare in the heartland!
